Suhrkamp releases anthology with a contribution by Christoph Ingenhoven

Date
17.12.2019

On the occasion of Peter Sloterdijk's 70th birthday, the „Center for Art and Media Karlsruhe“ organized a symposium that focused on the philosophical, literary, economic, ecological, art-theoretical, political and religious-analytical aspects of the extensive work of the German philosopher and author. The contributions were now published for the first time in »Von Morgenröten, die noch nicht geleuchtet haben – Ein Symposium zu Peter Sloterdijk« (Suhrkamp). With the contribution "Working on Spaceship Earth or: The green Agora", Christoph Ingenhoven took part in the symposium, dealing with the question "how to repair the construct earth, prevent further damage and design it for the future". The book was published as paperback in November 2019 by the German publishing house Suhrkamp.
