Marina One Singapore: “Honourable Mention” at INDE.Awards 2018

Date
25.06.2018

Singapore – Marina One received an Honourable Mention at the INDE.Awards 2018 Gala on Friday, June 22, 2018.

The jury of the Indesign Media Group from Asia stated that it is "a building with a future vision for the tropical city".

In the category "The Building", which is granted to a project that advances architecture and its capacity to respond to place-specific, cultural needs, ingenhoven architects' design was highlighted.

Marina One in Singapore is to date the largest project by ingenhoven architects. The project was officially opened on 15th January 2018. As an international role model for living and working, Marina One makes an innovative contribution to the discourse on mega-cities, especially in tropical regions, which, in the context of increasing population and climate change, face enormous challenges.

The high-density building complex with its mix of uses extends to over 400,000 square meters and, with its group of four high-rise buildings, defines the Green Heart—a public space extending over several stories. This three-dimensional green oasis reflects the diversity of tropical flora. It was designed by ingenhoven architects in close cooperation with landscape architects Gustafson Porter + Bowman.
