Joachim-Erwin-Platz 1: Topping out celebration on 12 August

Date
12.08.2022

At the topping-out ceremony, more than 100 guests were given a first glimpse of the shell of the building on Joachim-Erwin-Platz. The so-called JEP1 is designed in such a way that it integrates very purposefully into the newly designed city centre.

The curved façade harmoniously adapts to the heights of the neighbouring buildings. The round forms also open up new lines of sight to the Düsseldorf Schauspielhaus. The new building follows our supergreen® principles - a holistic system of insights and requirements for future-oriented construction and sustainable architecture.
